

Software Developer - Mobile (React Native)

Digital Native - Brisbane QLD

\$120,000 a year - Temporarily remote

[Apply Now](#)

The Role

You will be working as a mobile developer in the Web Technology team, developing mobile applications for both their external and internal users. They have chosen React Native to deliver their mobile services and apps to their userbase, they have a strong focus on automation and have full CI/CD pipeline to remove the grind so they can focus on coding.

The initial project you will be working on is a greenfield one currently in the UX design phase. You will work with another mobile developer and the broader web team to deliver this project end to end, so demonstrated experience of end to end delivery of a mobile project will be essential.

The role is fully remote at this point with the occasional office visit to their Brisbane CBD office. Their team will look at some partial return to the office down the track, but they expect this team to remain mostly remote after COVID-19.

Responsibilities

- Writing React Native code
- Brainstorming system architectures with the rest of the dev team
- Working with design and UX team
- Resolving build issues on iOS and Android targets
- Contributing to bi-weekly sprint planning
- Writing unit and integration tests
- Investigating and debugging issues raised in any environment
- Releasing apps on App/Play Store
- Contributing to open-source projects

Required skills and experience

- Experience building web or mobile applications using modern JavaScript (ES6) and Restful
- API Integration
- Experience working with React Native or someone with significant React experience who is keen to skill up and focus on React Native.
- Experience with native build processes including deploying apps to App/Play Store
- Takes pride in readable, well-designed, well-tested software
- A self-starter who can demonstrate that they can succeed in working in a team that deals with ambiguity every day
- Experience with Cloud Services, ideally Azure or AWS, GCP etc.

Next Steps

For more information on the role, please contact Aaron or Phil on 0408 966 944 / 0413 477 114 or jobs@digitalnative.io
